EDUCATION

B.Tech, Information Technology	2024 – 2028	Delhi Technological University, New Delhi	CGPA: 7.78
XII (CBSE)	2022	G.S.B.V. No. 2, Y.V.	84.6%
X (CBSE)	2020	G.S.B.V. No. 2, Y.V.	80.6%

SKILLS

Languages: C, C++, Python, JavaScript

Frontend & Backend: ReactJS, Tailwind CSS, Node.js, Express.js, REST APIs

Database & Tools: MySQL, Git, GitHub

Concepts: DSA, DBMS, OS, OOP

PROJECTS

Ride-Sharing Backend System (*under progress*) | Node.js, Express.js, WebSockets, Redis, MySQL

- Built a scalable ride-hailing backend with REST APIs for booking, real-time driver tracking via WebSockets, and geolocation-based driver-passenger matching
- Integrated Redis caching for low-latency access to nearby driver data, reducing repeated DB queries on hot data
- Designed service layer for horizontal scaling, demonstrating practical distributed systems concepts

Placement Intelligence Platform (*under progress*) | Python, ReactJS, MySQL, scikit-learn

- Developed a full-stack platform analysing DTU placement history to generate personalized preparation recommendations per student profile
- Built company-wise selection prediction using Logistic Regression and Decision Trees with feature engineering on real datasets
- Designed an analytics dashboard with interactive charts for company trends, cut-offs, and branch-wise success rates

2-Player Chess Game (*completed*) | JavaScript, HTML, CSS

- Enhanced and customized a browser-based Chess Game by implementing and debugging core features and improving the UI
- Fixed deployment issues to ship a stable, playable build, while working through the underlying AI/game logic (minimax-based move evaluation)

TEACHING EXPERIENCE

- Mathematics Tutor, Class IX to XII — plan and deliver structured lessons, break down problem-solving approaches, and track individual student progress
- Strengthened concept clarity and communication skills by translating advanced topics into simple, exam-focused explanations

ACHIEVEMENTS & COURSEWORK

- Solved 200+ LeetCode problems across Arrays, Trees, Graphs, DP, and Sliding Window
- Completed DSA course (C++) covering Trees, BST, Heap, Graphs, Greedy, and Dynamic Programming
- Coursework: DSA • DBMS • Operating Systems • Machine Learning • Algorithm Design & Analysis • Software Engineering
